

Best in their class!

"The constant innovation shown by ESET over the years in response to emerging threats has proven to our customers that the choice to move to and stick with ESET over the years has been invaluable."

Kevin Tierney, Senior Technical Engineer

Quick Facts

- Hospitality and SME IT solution provider
- Established in 1993
- 4859 PCs and 689 servers
- Using ESET since 2010

CUSTOMER

Established in 1993, Tierney's are regarded as a leading independent IT solution provider within the Hospitality and SME sector across Ireland and the UK.

Tierney's provide a trusted and reputable range of IT Solutions, Support and Consultancy Services to the International Hotel, Restaurant and Leisure Industry.

Tierney's goal is for their clients to gain the maximum from their IT investment helping them achieve their specific needs, and to offer excellent service and value for money to ensure a more productive and efficient running of business.

ESET asked Kevin Tierney, Senior Technical Engineer and Andy Tierney, Managing Director about their experience using ESET.

OVER A DECADE WITH ESET

"We have been using the full range ESET products since 2010. Currently we're using ESET on 4859 workstations and 689 servers. We were using another known security brand previously, but we found that solution hard to manage. We never experienced any issues installing, updating or running ESET."

VERY GOOD SUPPORT

"We received all the necessary support from ESET Ireland with regards to our installations, updates and other issues related to running and maintaining the software. ESET are very good at providing support, we've no issues encountered."

We also haven't had any trouble with malware infections since running ESET. It has fortunately stopped everything malicious in its tracks."

ESET IS BEST IN THEIR CLASS!

"Our business is to provide our customers with reliable and secure IT systems. A large component of our security suite is ESET. Why ESET? Well, their products are best in their class, they provide fantastic support when we need it, and we have been able to scale their product to suit small to very large customers. We would recommend ESET to other companies."
